Hi Garrett,

I had another call from Louis saying that Linda at the HQ told him today that a one-lane bridge for such a low traffic volume would be ok! He called back a second time and confirmed that as long as we have 18 feet of clear distance between the barriers it would be acceptable. (That would make the bridge width $1.5' + 18' + 1.5' = 21'$.) I had done most of the work of changing the forms except the Bridge General Plan (GP) changes for the 25' wide bridge, but we are still ahead. Right now the bridge is 19.5' and Louis said making the change to 21' and bringing the revised GP to the Field Review meeting was acceptable. Sometimes, the more things change, the more they stay the same!
